In all honesty I think the marketing for this app is legit, and I understand the need for this app to fill the hole which people have been asking for. I would trust this app for editing and retouching images for real pictures (not the pre-edited and poorly retouched pics that are found on Instagram, Facebook, etc). Continuous Feedback – Love it! But I honestly, probably just me, would like a "back" button when I make edits and moves the grid to a new location and just like Photoshop, I hate having to scroll through my work. This is little annoying glitch. I pity my fellow app reviewers who have this app, but don't know it's feedback function. Yeah, I know, I'm just trying to get reactions here. I'm sorry, I'm sure the iPhone photographers who like the app are loving it. As a photoshop user, I'm sorry, but this app lacks very much. I didn't even think it would be as bad as it is, but I have no desire to go to this app after I tried it. I bought several of the Elements workshops, and the only things I didn't like, the graphics are ephemeral because they're saved in memory. So, if I have to logon again, they're gone. This was one of the reasons I rated the program so high. I know some brilliant teachers, and real designers who would kill to have the kind of image skills the teachers have. They created not only realistic smiles, frowns, and scowls, they also morphed faces and look-alikes, and other related items.
